Moscow.

#### 1. Technology

50 years ago Moscow was mostly famous for its sights, but now it's described by everyone as a modern city where the newest hardware and software are developed. You won't believe it, but almost 70% of world's gadgets are produced here and everyone has an opportunity to visit „Moscotech” - a place where these are made! There you can watch what Moscotech's CEO calls the „Integrated manufacturing” - people working along with robots to make the facility work in the most effective way possible.

#### 2. Transport

But technology isn't just about gadgets, it's also about transport. Moscow is the only place on the entire planet where people drive (if it's appropriate to say so) flying cars. These vehicles are silent and energy efficient, because they're electrical. Because of the fact that they can fly on different heights there are no traffic jams in Moscow anymore and traveling is now faster than ever there.

#### 3. Bright minds

That kind of progress is only real because of many online schools and universities that are completely free. People in Moscow became intelligent and smart after establishment of those.

#### 4. Free time.

VR technologies are now used in Moscow's cinemas and people love it, because it feels almost as real as the actual life. You can watch these movies yourself if you <sup>go</sup> there!

#### 5. Food.

Eating is also modern here, you don't have to cook at all, you can just buy it online
