### ANSWER SHEET

ID number

A - 1 1

#### PROGRESSIVE CITY

##### Drastic changes

The city has lived through a massive amount of events. Saint-Petersburg survived a lot of substitutions made in the government, which led to the development not only in economic, but also in cultural, education, transport systems. What a cater journey!

##### Typical amuzements

50 years ago there were only art galleries, shopping centres <sup>integrated</sup> with cinemas, ~~and~~ attraction parks. Life was boring, residents did nothing but going to obsolete places over and over again. In present days, more activity areas were added: ~~the~~ <sup>60</sup> cinemas, parks with an open imax Cinema, museums with animations, where you can feel the presence of the ancient, greet the Queen Elisabeth, even talk to Vladimir Putin.

##### Everything new

Do you think people still use cars in our city in 2070? What a nonsense! There has been a revolution in technology. Now, you are likely to witness flying cabins with no noise <sup>no</sup> and <sup>and are</sup> damage to the environment. Computers have a different software, made of recycled materials. Saint-Petersburg is known for thinking about future generations. Other vehicles are also environmentally friendly.

##### Healthy eating

Residents of our city tend to watch their healthy and body. The products are made of ~~unhealthy~~, genetically modified waste, water. Knowledge for life!

The main quality of Saint-Petersburg ~~is~~ <sup>is</sup> the best universities in the universe. Our education system is the most effective compared to other cities. In addition, there is a big range of jobs.

##### Final marks

To conclude my entry I have to say that our city is ~~a~~ diverse, technologically developed and environmentally friendly place for everyone. Come and see yourself!
